

TATOUAGE DESIGNS

TREE BRANCH

INSTRUCTIONAL INSERT

The completed Tree Branch will be approximately 59.5" w x 31" h. This Tree Branch's design allows for it to come out of corner or from behind a piece of furniture. It's been designed so that it can be laid out from left to right or from right to left. In our example below, we decided to have our mural go from right to left.

As always, please remember to keep the protective backing on all sheets until you have measured your space and are happy with placement.

1. Cut the "Extra Leaves" away from Sheet 1 and lay them to the side for use once you've applied all sheets. Apply Sheet 1.

2. Cut the "Extra Leaves" away from Sheet 2 and lay them to the side. Apply Sheet 2.

3. Next apply Sheet 3

4. Apply Sheet 4

5. Apply Sheets 5 & 6

6. The birdhouse must be put up BEFORE you can attach the chain. Simply hold up the chain and the birdhouse WITH THE PROTECTIVE BACKING STILL ON. Measure out where the birdhouse needs to be in order for the chain to attach to the top of the birdhouse and the tree branch. Apply Birdhouse.

7. Now you can add the chain.

8. You're almost finished... if you'd like, go back and add some of the extra leaves we've included to achieve a more "full" look. Or if you're happy with the tree as it is, pat yourself on the back you're all done!
